

GLENDALE MALL – MITAA Plaza – Glendale, California.

Built on a two and half acres site in City of Glendale in Southern California, this 200,000 square foot project integrates shopping and entertainment uses into a natural environment to create a destination for the growing population of Korean American in this city.

This project made up of two major building components. The Mall building which is five-story tall dissect by a five-story tall glass atrium which also connect to an eight-level parking structure to the west of this complex. The Mall building is Oval in shape. There are elevators and pedestrian bridges design for easy access from the parking structure. The retail stores will share the dynamic five-story atrium with escalators, carved plaster ceilings and glass skylights. All the storefronts are richly detailed. Luxury retail space will be available to name-brand stores. This Mall is lined with dining areas, health spa, club, corporate and medical offices in the top floors overlooking the City view.
